## Polyvine paints and metallics

Polyvine has an unrivalled reputation among trade professionals for unique, innovative and high-performing products - products which are designed for maximum protection and ease of use.

Our paints and metallics are easy to apply and have all the features that trade professionals demand from spirit based formulations with their high grade finishes but with all the advantages of water based products including much shorter drying and curing times.

All Polyvine paints and metallics are manufactured in the UK.

**interior**

**exterior**

**number of coats** - best applied by brush

**number of coats** - best applied by roller

**drying time**

**biocide boost** - ensures that the finished surface remains free from mould, algae and fungus

**high abrasion and impact resistance** - resistant to wear, scuffing and rubbing.

**high UV resistance** - contains UV filter protection

**water wash up** - containers and tools wash in water

**quick drying** - touch dry sooner and ready to recoat

**approximate US equivalents:**

50g - 1.76oz, 75g - 2.6oz, 500ml - 17.6oz, 1 litre - 35.2oz, 2.5 litre - 87.9oz

# metallic paint

completely realistic metal finish  
that does not tarnish or fade

lustre finish

## metallic paint interior and exterior

The deep rich colours give a sleek, luminous finish that dries to a polished lustre. Used by decorative artists worldwide, the shimmering richness of classic metals creates a luxurious finish for both inside and out. This unique blend of fine metallic lustre particles and hard polymer has good brushing and spreading properties, giving an extra hard, high quality gloss finish.

### ideal for

**interior:** • walls • ornate plaster work • picture and mirror frames • furniture • pottery

**exterior:** • metalwork - gates, railings • door furniture • statues, ornaments, sculptures

### unique qualities

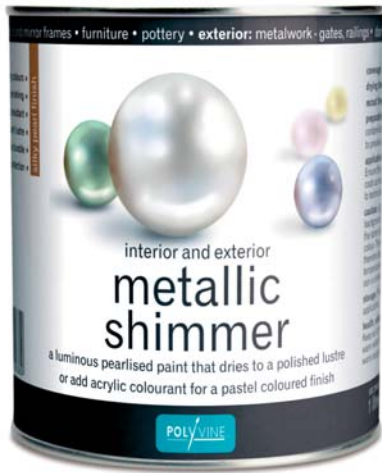

• highly durable • superior metallic sheen  
• water and heat resistant • retains metallic lustre  
• very high UV protection

coverage: 10 square metres per litre

drying time: 2 hours

available in: 500ml, 1 litre, 2.5 litre

silky pearl finish

## metallic shimmer

### interior and exterior

Create the metallic colour of your choice: pearlescent pigments and traditional colour pigments can be uniquely combined to create beautiful non tarnishing shimmering colours. Mix with Polyvine Acrylic Colourant to create a large range of pastel pearlescent colours. Used straight from the tin it creates a pearlescent finish. Ideal for interior and exterior applications.

#### ideal for

**interior:** • walls • ornate plaster work • picture and mirror frames • furniture • pottery

**exterior:** • metalwork - gates, railings • door furniture • statues, ornaments, sculptures

#### unique qualities

- create shimmering colours • non-tarnishing
- water and heat resistant • retains pearlescent lustre • highly durable • very high UV protection

coverage: 10 square metres per litre

drying time: 2 hours

available in: 500ml, 1 litre, 2.5 litre

## mixing metallic shimmer and acrylic colourant

Add the whole 50g bottle of Polyvine acrylic colourant in the colour that you have chosen to your 500ml of metallic shimmer. Ensure the product is thoroughly mixed. Try a small test area first. Apply 2-3 coats as required with a good quality brush. You can use a similar base coat colour to greatly increase the covering power.

To create paler colours or tints just add smaller amounts of colourant and for darker tints, use more colourant.

metallic shimmer    acrylic colourant

## glitter paint maker

sparkling glitter for decorative finishes

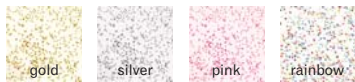

A shimmering metallic glitter specially developed to add to any water based paint or varnish giving sparkles of light to your finish. Simply mix with your choice of coloured paint or varnish to create a sparkling decorative effect.

### ideal for

- adding to chalk paint • metallic paint
- emulsion paint • furniture paint
- for application to ornaments • walls
- painted surfaces • paper • fabrics • doors
- furniture • feature walls

### unique qualities

- shimmers when dry • superior quality
- fine metallic particles

coverage: the same as the base mix  
use 75g (1 pot) per 2.5 litre, 30g per litre

drying time: the same as the base mix

available in: 75g

intense gloss finish

## sparkling glitter glaze

interior and exterior

Sparkling glitter dries to a shimmering and durable finish. The glaze dries clear, allowing the glitter to sparkle on the surface leaving a washable surface when dry.

Use with stamps and stencils on complimentary backgrounds to produce glittering silhouettes.

### ideal for

- furniture • ornaments • painted surfaces
- highlight metallics • wallpaper and borders
- fabrics • highlight complimentary areas through stencils

### unique qualities

- easy to apply • generous glitter content
- wipeable surface once dry • wash tools in water • non-hazardous • low odour
- durable finish

coverage: 8 square metres per litre

drying time: 1-2 hours

available in: 500ml

## acrylic enamel paint multi surface

For interior and exterior use, in fact, anywhere a traditional solvent based enamel was used, these tough, durable enamels are available in a large range of intermixable colours which can be used on plastic, metal, wood, glass, ceramic, card and porcelain. Safe for children's toys. Suitable for brush or airbrush application.

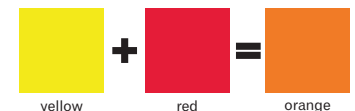

## acrylic colourant for concentrated colour

Super high quality acrylic pigment specifically formulated to give superior colour saturation. Can be used with all water based products including metallic shimmer, scumble glaze, stain, emulsion, varnish and interior paint, glue, filler, masonry paint, tile grout and cement.

All colourants are intermixable to give any colour or shade, for example

coverage: dependant on base medium

available in: 50g

matt chalky finish

## chalk paint maker

for unlimited colour matching

This unique formulation turns any emulsion paint into a chalk paint when mixed together, to create a velvety smooth, chalky finish. Varnished or painted surfaces rarely needs priming, making furniture renovation simple.

### ideal for

- vintage look • upcycling furniture
- distressing • shabby chic • wood • stone
- ceramic • primed metal • primed matt plastic

### unique qualities

- velvet smooth • dead flat finish • rarely requires any surface preparation • works over old painted or varnished surfaces • covers in one coat • low odour • brushes and tools wash in water

coverage: the same as the emulsion paint

drying time: the same as the emulsion paint

available in: 500ml

clear dead flat finish  
clear satin finish

## chalk paint waxer

protects with a velvet smooth finish

This unique brush on wax finish varnish maintains the velvet smooth, chalky finish of your paint, whilst protecting it from scuffing and moisture. The dead flat finish maintains the look and feel of the chalky paint while the satin finish can be buffed to a traditional silky feel of wax.

### ideal for

- vintage look furniture • upcycled furniture
- distressing • shabby chic

### unique qualities

- velvet smooth • traditional silky feel of wax
- protects against scuffing • prevents water damage • low odour • brushes and tools wash in water

coverage: 15 square metres per litre

drying time: 1-2 hours

available in: 500ml

silk finish

## antiquing waxer

protects with a velvet smooth finish

This unique brush on antique wax finish maintains the velvet smooth, chalky finish of your paint, whilst producing an aged finish. It can be buffed to leave your piece with a smooth waxy texture.

### ideal for

- vintage look furniture • upcycled furniture
- distressing • shabby chic

### unique qualities

- velvet smooth • traditional silky feel of wax
- protects against scuffing • prevents water damage
- low odour • brushes and tools wash in water

coverage: 10 square metres per litre

drying time: 1-2 hours

available in: 500ml

## high quality brushes

hand made in the UK

These high quality brushes have been designed specifically for paint and varnish work. Each brush type has been designed and manufactured by hand in the UK for use with particular Polyvine products to enable a smooth, even spread of product, for a professional finish.

### chalk paint brush 30mm, 40mm, 50mm

With its oval shape and stubby, flat cut, natural bristles, this brush has been specifically designed to load and spread the chalk paint evenly.

### varnish brush 1", 2", 3"

The ultra fine, soft synthetic bristles of our varnish brushes, with a thin profile specifically for applying water based varnishes evenly for a smooth finish.

The light weight wooden handle ensures that not too much pressure is put on the finished surface, allowing you to brush out streaks and create a thin film finish.

### paint brush 1", 2", 3"

The ultra fine, soft synthetic bristles of these brushes load well and distribute evenly, for an ultra smooth finish.
